### Typical Characteristic Curves

#### 4. Input current

When the electricity is provided by the unstable power supply, please make sure that the range of the output voltage fluctuation and the ripple voltage of the power supply do not exceed the indicators of the modules. Input current of power supply should afford the flash startup current of this kind of DC/DC module(see Fig. 4).

Generally: Vin=5V Iave =1297mA

Vin=12V Iave=648mA

Vin=24V Iave=307mA

Vin=48V Iave =158mA
