

## ■ Features :

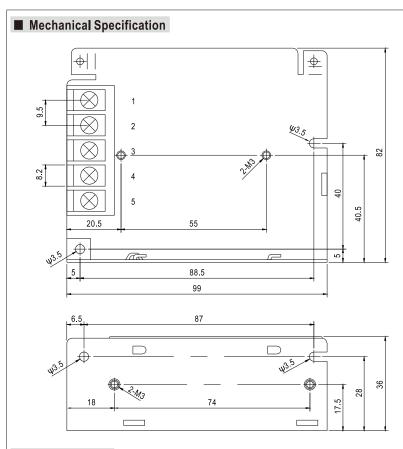

- Universal AC input / Full range
- Protections: Short circuit / Over load / Over voltage
- Cooling by free air convection
- LED indicator for power on
- 100% full load burn-in test
- No load power consumption<0.5W
- All using 105°C long life electrolytic capacitors
- \* Withstand 300VAC surge input for 5 second
- $^{\bullet}$  High operating temperature up to 70°C
- Withstand 5G vibration test
- High efficiency, long life and high reliability
- 3 years warranty

| NOTE        | Ripple & noise are measure     Tolerance : includes set up     Line regulation is measurec     Load regulation is measure     The power supply is consider     a 360mm*360mm metal plate perform these EMC tests, p | All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.  Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.  Tolerance: includes set up tolerance, line regulation and load regulation.  Line regulation is measured from low line to high line at rated load.  Load regulation is measured from 0% to 100% rated load.  The power supply is considered a component which will be installed into a final equipment. All the EMC tests are been executed by mounting the unit or a 360mm*360mm metal plate with 1mm of thickness. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)  The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500). |              |              |                         |              |              |  |  |
